

ENGINEERING, INNOVATION & SAFETY

LEADING WHOLESALE SUPPLIERS OF LIFTS

ABOUT COMPANY

Leading Suppliers of Lifts & Parts with over 3 decades of experience, Today, the HEXA LIFTS is one of India's leading wholesale suppliers of home lifts, goods lifts, hydraulic lifts and is active in the areas of production, installation, maintenance and modernization. It's innovative, environment-friendly access and transit management systems make an important contribution to mobility in urban societies.

Preferred Urban Mobility Provider: HEXA LIFTS India are pioneers in providing one stop solutions for all vertical transportation requirements. We are a top-notch supplier for Home Lifts, MRL Lifts, Goods Lifts, & Hospital Lifts in North India. Furthermore, we provide complete consultancy for obtaining NOC & hassle-free installation of lift in DDA apartments / group housing societies.

World Class Trained Technicians: Our State of the art, ISO9001:2008 certified training centres across 3 major locations in India provide hands-on training to our engineers, which improves the reliability, quality and uptime of your elevator.

R&D Facility: Our Corporate R&D facility focuses on developing world-class products for local and India markets.

Customer Loyalty: Customer Loyalty is a new dimension of customer satisfaction survey. The new Closed-loop Customer Survey Provides us with relevant insights into our customer experience, Closing the loop with our customers is essential to come full circle and improve their experience.

Safety as a Culture: The safety of our customers & employees is of prime importance in Hexa Lifts strategy and is visible across all platforms which include products, Installation sites, offices and factories.

HEXA LIFTS Field Link: HEXA LIFTS equips all its service engineers with a mobile device which is one of the most comprehensive service instruments in the industry and enables them to ensure maximum uptime for your elevator.

The Group Focus, "Leadership through Customer Service" is the cornerstone of Hexa Lifts India's growth strategy which is evident with our service presence across 10 major cities which include our branch offices as well.

		0,3	120	6xØ6	10	118	1,2	95,5	12,7	8,0

FEATURING THE BEST OF TECHNOLOGY

Car fan automatic sleep: Car fan automatically stops when there are no registered calls resulting into saving in power and life enhancing of elevator.

Safety in case of rope breakage: In the incident of breakage of ropes, elevator speed exceeds the rated speed in the downward direction due to gravitational pull, thus the overspeed governor activates the clutch mechanism, thereby switching off the main controls and jumping the elevator car safely on guide rails.

Emergency alarm: In case of an emergency or power failure, help can be obtained by alarming or communicating through system which is battery operated and is self charging. PLC based controller: The V3F system provides the highest degree of smoothness in elevator with precise leveling, in addition to this the frequency of power conservation is very high therefore upto 40% of energy can be saved during normal operating conditions.

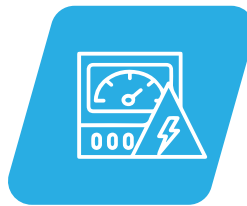

Infrared light curtain: Full height infrared curtain with multiple crisscrossing light beams detect the smallest obstruction in the path and stop doors from closing.

Overload sensor: On overloading of the lift audio visual indication is provided and doors are kept open until excess load is removed.

UPS Powered Lifts: This electronic device is an effective power backup solution for elevators. in case of a power failure the lift doesn't stop rather it automatically comes to the nearest level and the door opens, furthermore the door remain open until electricity is restored.

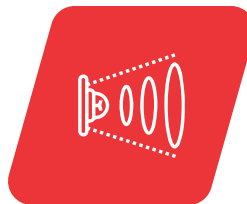

Eco-friendly/Green Vertical design (ROHS cart and energy certificate rating). It doesn't require lubrication oil

Protection against power fluctuation

PU Buffers
Time based elevator car parking on particular floor

Infrared light curtains
Fire rated landing doors

Elegant LED Lights and car fan with automatic sleep

Emergency Rescue Button in Lift Car

THE HEXA MACHINE ROOM LIFT

What makes the HEXA machine rooms lifts special

- Economical
- Comfortable
- Suitable for high and medium rise buildings
- Versatile
- Low noise
- No odor
- Large cab
- Affordable price
- Combination of flexibility and performance

- The traction elevator system is the popular because of its flexibility.
- Choice between of traction lifts: geared and gearless.
- The geared traction lift is majorly composed of 2 parts: the gear box the motor.
- The traction machine may be located at the top of the building, in the machine room.
- For a high-speed elevator in high-rise building, a traction elevator is a preferred choice. capitalizing on advances in motion control technology (variable Voltage Variable Frequency), a frequency inverter facilitates the starts and stops of the machine and saves energy.

THE HEXA-STRUCTURE LIFT FOR DDA/GROUP HOUSING SOCIETIES

- Do You Have Difficulty climbing stairs?
- Do you have Difficulty finding space for a lift?
- Do you live on a top floor or 3rd floor or 2nd floor of
- DDA apartment/group housing society?

HEXA Hydraulic Lift

TECHNICAL FEATURES

Accessibility	It eliminates architectural restrictions
100% Safe	Completely safe and fully compliant with the standards
Motors and Voltages	Available in single phase and 3 phase
High Energy Efficiency	Low energy consumption, the energy use is like that of a 230 Volt standard household appliance
Eco-friendly	Environment-friendly machine
Flexible	It can be a 100% customized
Can be tailored to individual requirements	Wide range of doors available from automatic from automatic, semiautomatic, manual landing doors.
